

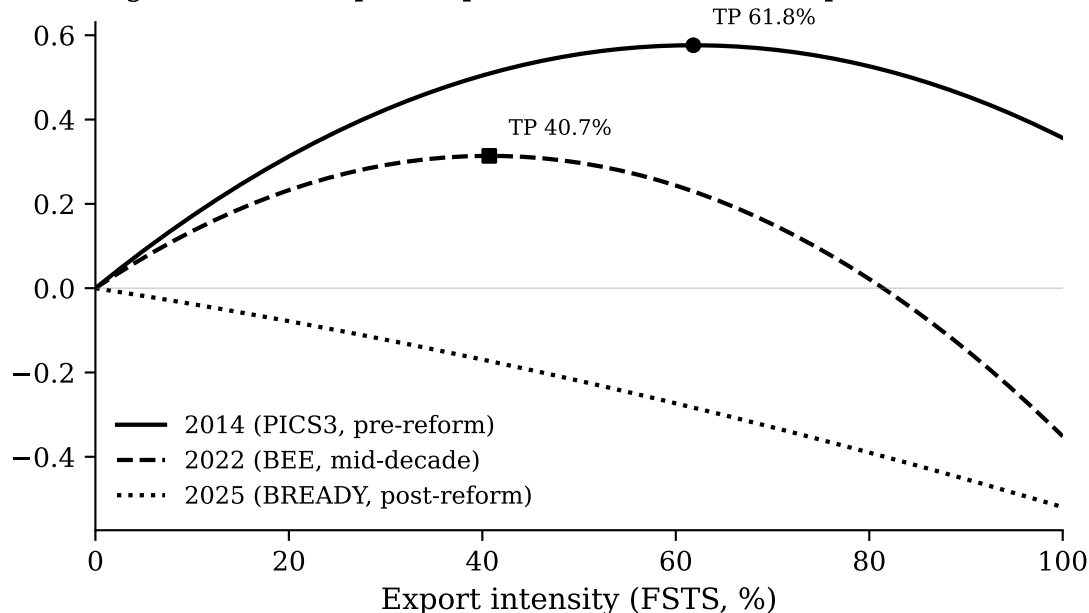

Figure 2. Wave-specific predicted I-P relationship — India 2014, 2022, 2025

Notes: Curves show $\hat{\beta}_1 \cdot \text{FSTS} + \hat{\beta}_2 \cdot \text{FSTS}^2$ from M2 regressions. Turning points (markers): 2014 = 61.8 %, 2022 = 40.7 %, 2025 = undefined (curvature non-significant). N = 8,941 (2014), 9,300 (2022), 10,476 (2025).
